February 2017

Dear NHS Students, Faculty, and Alumni,

Thanks to everyone for their participation in recruitment activities last week! A couple of dissertation defenses are coming up this month. We hope many of you will be able to join.

As always, please let us know about any of your accomplishments and feel free to email us (kkdenni@emory.edu; shruthi.cyriac@emory.edu; rejone4@emory.edu) with any feedback or events that you want listed!

Cheers,

Kristine, Shruthi, & Becca

ALUMNI SPOTLIGHT

Nida Shaikh

Background:

Dr. Shaikh is a nutrition epidemiologist and registered dietitian who received a PhD in Nutrition and Health Sciences from Emory University in 2016, a Masters degree in Nutrition from Georgia State University in 2010, and a Masters degree in Dietetics from University of Pune in 2008. She is currently a 2016-17 NIH Fogarty Global Health Postdoctoral Fellow at Emory University, US and at Madras Diabetes Research Foundation, India.

What I am currently doing:

I am a NIH Fogarty Global Health Post-doctoral Fellow working with Dr. Mohammed Ali at Emory University and Dr. V. Mohan at Madras Diabetes Research Foundation in Chennai, India. My project is focused at the intersection of nutrition, depression, and Type 2 diabetes and is nested within a NIMH-funded trial that seeks to test the integration of depression-focused intervention into existing diabetes care platforms in India. More specifically, I am investigating the relationship between diets, dietary behaviors, and cardio-metabolic outcomes among adults with co-morbid diabetes and depression. I am also working on projects to understand and compare the prevalence and risk factors of co-morbid diabetes and depression across India and the US.

I am continuing to work on papers from the data collected during my dissertation; these papers are focused on comparing the Nutrition Transition aka trends in diet and eating behaviors among adolescents from both urban and rural regions in India. I am also writing a grant to extend the evaluation of the adolescent Nutrition Transition-FFQ, developed during my dissertation, among other populations. One of the things I like doing most is mentor undergraduate and graduate students at Emory on semester to year-long research projects.
